**Subject:** RE: Information Relevant to the Skyline Water Situation

Thanks for asking, Dana.

Just so we are clear, the Skyline Mine Addendums to the PHC include: 1)the PHC - July 2002, Appendices A through E; 2) October 2002 Appendices F through K; and 3)the 21Feb05 Canyon Fuel Company response to the Pacificorp July 6, 2004, report. While a DOGM employee, I believe I also internal technical memos on the two Pacificorp reports. These all contain 'volumes' of information - as you suggest.

In our initial reading of the recently submitted Pacificorp reports, we have also identified some fundamental questions that affect the validity of the reports. We will likely plan on responding in the near future.

Call if I can be of any help,  
Gregg

Subject: Information Relevant to the Skyline Water Situation

Pam,

In addition to the two reports we just received, the following are the reports that are relevant to the Skyline water situation:

Skyline Mine Addendum to the PHC (includes HCl report and other solute analysis, tritium, dye tracing, etc.)

PacifiCorp Report June 26, 2003 (David Hansen)  
Appendix to PacifiCorp Report July 6, 2004 (David Hansen)

I don't think the PHC addendum has been scanned.

Gregg, am I leaving anything out? Also, do you have updated dye-tracer results that are not currently in the PHC addendum?

Thanks,  
Dana
